

Index

A

Acheulean handaxe, 58, 363, 373, 385–387, 395–397

Adaptation

vs. adaptive behavior, 59

behavioral, 28–29

biological processes of evolution, 39

cultural, 8, 9

evolutionary archaeological theory, 38

evolutionary psychology, 370

fitness-enhancing, 37

group fitness, 119

human subsistence behavior, 322

innovation, 56

natural selection, 256

polynesia, 8

sexual selection hypothesis, 423

and taxonomic diversity, 113

technological, 34

Agency, 10, 61, 245, 261, 280, 339, 348, 381, 384, 387, 391, 393

Agent-based models, 268–269

Agrarian taxation, 219, 326–329, 332

Agriculture

HBE (*see* Human behavioral ecology (HBE))

human-altered environment, 245

maize, 315

and marginal valuation, 265–266

NCT, 218, 267–268

origins, 9, 120, 332

socio-cultural determinants, 318

subsistence-related problems, 296

Analogy, 26, 30, 31, 37, 187, 189, 192, 389, 424

Anthropocene, 224, 339, 348–349

Anthropological archaeology, 10, 232, 243–247, 277–281, 285, 286

Archaeology

cladistics, 153

cultural microevolutionary research (*see* Cultural microevolution)

methods, 256

natural selection (*see* Natural selection)

phylogenetics (*see* Cultural phylogenetics)

transmission (*see* Transmission, cultural)

Atlatl, 73–77

B

Bayesian phylogenetics

archaeological interpretations, 177–178

in archaeology, 161

Bayes factor, 162–163

data acquisition and classification, 167–169

inheritance and transformation, 161

model-based approaches, 163–165

macroevolutionary patterns modeling

diversification rates, 174–176

mosaic evolution, 173–174

time estimates, 174

model selection

best-fitting model, 171

family, 169–170

specifying model settings, 170

research questions, 165–167

tree-building, 171–172

Boserup models, 12, 222, 223, 311, 314, 315, 330–331

Broad-spectrum revolution, 260

Butchery, 223, 231, 237, 238, 240, 284

C

Carcass transport, 238

The Chaîne Opératoire approach

individual stages, 365–366

MET and RECA, 369

operational sequences, 51

syntactic aptitude, 364–365

Chiefdom, 7, 9, 134, 187–192, 194, 197–200, 206–208

Clade, 8, 27, 78, 149–151, 153, 166, 172, 174, 175, 177, 191

Cladograms, 149–157

Coevolution, 3, 12, 97, 113, 117, 132, 153, 264, 372
